

Veterans Upward Bound Program Annual Performance Report (APR)

Frequently Asked Questions and Responses

Program Year 2002-2003

Listed below is a summary of the most frequently asked questions about completing the new Upward Bound Annual Performance Report divided into what we define as “Technical Questions” and “Programmatic Questions.”

Section I: Technical Questions are related to computer programs, software issues, and electronic submission requirements. Questions 1 through 9 of this section address issues related to *Preparing the Annual Report* while Questions 10 through 16 address issues related to *Submitting the Annual Report* to the Department of Education.

If you have additional technical questions, you should contact our Help Desk by either telephone (703) 846-8233 ext. 247 or e-mail at UBWEB@cbmiweb.com.

Section II: Programmatic Questions require clarifications or interpretations of the data requirements of the report. For answers to these types of questions, please contact your program specialist directly. A state listing of program specialist assignments is available at the following Web address:

<http://www.ed.gov/programs/trioupbound/statedir.html>

I. TECHNICAL QUESTIONS

PREPARING THE ANNUAL REPORT

Each Veterans Upward Bound project is required to prepare the annual performance report in accordance with the instructions provided at the following Web address:

<http://www.ed.gov/print/programs/trioupbound/report.html>

There are three sections to the performance report.

- Section I is project identification information;
- Section II are instructions for preparing the electronic file of individual participant records; and
- Section III is for the narrative summary of project objectives and accomplishments.

Prior to the due date for submitting the annual performance report to the Department of Education, each grantee must prepare electronic files with the individual participant records (Section II) and the narrative summary of other project objectives (Section III).

Question #1: How should a project begin to prepare the performance report?

Response #1: First, a Veterans Upward Bound project must review the required data elements (Section II-B of the report) to ensure that the project is collecting all the required information. If some data elements are not being collected, the project should develop plans and procedures for collecting the required data.

Next, the project should determine how it will prepare the electronic data file of individual participant records. Below in response to question #2 is a brief discussion of options available for preparing the participant data file.

If you currently have a management information system for your project with participant level information, you may choose to create a Text file or export the data to a spreadsheet or database. If, however, your project does not have a database or the database does not capture many of the required data elements, you may decide to use the Department's Tool (see discussion of this tool under question #3).

Question #2: What options are available for preparing the participant data file (Section II-B of performance report)?

Response #2: A grantee has three basic options for preparing the student data file. You may choose any of these options, provided you submit the data in accordance with the instructions for preparing the participant data file (Section II-B of the performance report). These instructions are available at the following Web address:

<http://www.ed.gov/print/programs/trioupbound/report.html>

Option A: Use the database or spreadsheet that you currently use to capture and manage your project data and then export the data required for the performance report to an Excel spreadsheet, Access database (mdb), or database file (dbf). If you choose this option, you must:

- change your column names to match the "Database Column Names" provided in column three of Section II-B – Record Structure for Participant List (if you are using Access, you must change the column names in the "Design,Table");
- provide the data (columns or fields) in the same order as the data fields in column one are listed in Section II-B of the report instructions (i.e., the first column of your spreadsheet must be VetPR, the second column must be VetBatchAY); and
- use only the valid field content provided in column eight of the report instructions. For example, the valid field content for "Gender" (field #9) is 1 for Male, 2 for Female and 0 for No response. Values such as M for Male and F for Female are not acceptable values.

Option B: Prepare a Text file in accordance with the record structure provided in Section II-B of the report. A Text file (sometimes called an ASCII text file) is a text-only

document that contains no formatting, e.g., word processor files insert special (non-readable) characters for bold text, italic text, and underlined text, etc. Most current word processing software will save a document as an “text” file, usually under the Save As... and Save As Type. . . options. This will remove all special formatting from the file. The advantage of a text file is that it is a standardized file type and many different software packages can read the data in the file. Once you have created the text file, you must check the file to ensure that the data fields exported correctly and that the data elements meet the valid field content requirements provided in column eight of Section II-B of the report instructions.

Option C: Use the software tool developed by the Department of Education for capturing and submitting the performance report data.

Question #3: What is the Department’s Tool?

Response #3: With input from the TRIO community, the Department has developed the VUB Annual Performance Report (APR) Participant Data Collection Tool (or VUB Tool), which is a self-installing electronic software application that you may use to collect the data required in Section II-B of the performance report. The VUB Tool is a standalone application that requires no additional software to run. However, in order to properly run this application, you must have an IBM-compatible PC with the Windows 95 (or higher version) desk operating system.

This application is designed to assist grantees, especially those without participant databases, in meeting the new performance reporting requirements. The tool will also help grantees check the quality of their data submissions in order to reduce the number of potential errors associated with importing data to the TRIO databases.

The application and instructions for using the tool are available for download from the following Web site:

<http://www.ed.gov/print/programs/trioupbound/report.html>

Question #4: Must an Upward Bound project use the Department’s Tool?

Response #4: As noted above under the response to Question #2, Veterans Upward Bound grantees have several options for preparing the individual participant records. You are encouraged to select the method most compatible with your current data management systems.

Question #5: What are the features and functionality of the software tool?

Response #5: The Department’s Tool is a software application to assist grantees in submitting the required data for the annual performance report electronically. *It is not intended to serve as a project management information system* and thus has limited functionality. Grantees without an automated participant recordkeeping system may use

the tool to manually enter the participant information. The tool is designed to reduce the number of input errors by prompting the user to enter valid field contents. Once all the required data are entered, the project can create a file to upload via the UB Performance Report Web site and submit to the Department of Education as Section II of its performance report.

The VUB Tool also has three additional features to assist grantees.

- The tool allows grantees to select data fields from other databases and imports the data into the tool. The grantee can then use the tool to check the data for formatting and field content errors. Once the data is checked, the grantee can create a file to upload and send to the Department of Education.
- The tool allows grantees to export the data to another database, spreadsheet, or management information system. This feature allows VUB projects to use the performance report data to develop a project management system without having to re-enter the basic data required for the performance report.
- The tool will generate a statistical report that aggregates the individual participant data.

Question #6: What is a delimited text file?

Response #6: A delimited text file contains rows of information that could be displayed as a spreadsheet or table format. However, since it is a text-only file, no special formatting can break up the information into columns. Therefore, a delimited text file consistently uses characters throughout the document to indicate a column break. These characters are known as the delimiters. Nearly any character can be a delimiter, but the most common delimiters are the comma and tab. Following is an example of using delimiters:

Prefix	First Name	Middle Initial	Last Name
Mr.	John	T.	Doe
Mrs.	Jane	A.	Smith

The previous table contains two records of data, one for each person. An example of a comma delimited text file containing the same information, without the column names, is as follows:

```
"Mr.,"John","T.,"Doe"  
"Mrs.,"Jane","A.,"Smith"
```

A tab-delimited file would essentially be the same, but tabs would replace the commas.

Question #7: What if the data are in MS Works Spreadsheet?

Response #7: When the user finishes entering all data into the MS Works database, the best format to send that data to the Department of Education is as a dBASE file.

- To create a dBASE file from MS Works, insert a floppy diskette into the A:\ drive.
- Start MS Works and the database that contains all the student data.
- Select **Save As** from the **File** menu. The *Save File As Type* will be an option on the **Save As** dialog box. Under *Save File As Type*, the user needs to select dBASE IV. Also, select the A:\ drive as the file destination.
- Then select Save or OK.
- You can then upload the file into the new UB Performance Report Web site to submit to the Department of Education.

Question #8: How can one prevent Microsoft EXCEL from automatically dropping the initial “0” in a date field?

Response #8: EXCEL attempts to convert all numbers to a correct format. By entering “022571” in a field, EXCEL will convert that to “22571” because that is a true number. *To avoid this problem, the cell needs to be formatted as a text field.*

- If you are entering data where an entire column will be in above format, select the entire column by clicking on the grayed column name, for example “E,” so that it turns gray.
- The next step is to select the Format menu and the “Cells...” prompt. You can also do this by clicking on your right mouse button while the mouse is over the highlighted column and selecting “Format CellsK”.
- A tabbed dialog box should now appear. The first tab, “Number,” is the tab you need to work with.
- Change the category to “Text”. DO NOT change the category to “Date” because it can give you some unexpected results.
- Once the cell/cells have been formatted as text, EXCEL will maintain the original “0” in “022571”.

Alternatively, to format as a text field, you may place an apostrophe as the first symbol within a cell.

Question #9: What do “A”, “N”, and “A/N” mean in the Type column of the record structure (Section II of the performance report)?

Response #9: These letters are abbreviations for the following types of data:

“A” stands for alpha characters (A to Z). For those fields designated by an “A”, only alpha characters are valid entries. If using Access, select “Text” in the field type.

“N” stands for numeric characters (0 to 9). For those fields designated by a “N”, only numbers should be provided. For example, Field #1 requests the student’s social security number (SSN). The only valid entries in this field are numbers. Hyphens should not be inserted in this field. If using Access, select “Number” in the field type.

“A/N” stands for alpha and numeric characters. Fields designated by “A/N” may contain alpha characters (A to Z); numeric characters (0 to 9); and punctuation marks such as periods, apostrophes, and dashes. If using Access, select “Text” in the field type.

SUBMITTING THE ANNUAL REPORT

Question #10: Are Veterans Upward Bound projects to submit the annual performance report electronically?

Response #10: Yes. All VUB projects are expected to submit the annual performance report via the World Wide Web. The Web application for submitting the report will be available at the following Web address around **October 22, 2003**:

<http://www.ed.gov/print/programs/trioupbound/report.html>

Question #11: How does a project use the Web to submit the annual performance report?

Response #11: The Web application for VUB grantees to use to submit the annual performance report has the following features:

- A Web form for completing the project identifying information (Section I) on line;
- Functionality to upload electronic files with the individual participant records (Section II) and the narrative summary of other project objectives (Section III);
- A submit button to send the entire report to the Department of Education; and
- An e-mail confirmation that the report has been submitted.

For the 2002-2003 report, so as to meet the Department of Education’s security standards and policy directives, the Web site will require the use of passwords. The Department will send a temporary password to each grantee; upon first use of the Web site, the grantee will be guided to select a new password that must meet certain requirements regarding number of characters and use of combinations of characters (English upper and lowercase, numerals, and special characters) A “forgot password” link and the Help Desk will be available should you need assistance with your password. Any project director who did not receive a letter or e-mail message from the Department containing the temporary password should call the Help Desk.

Question #12: How are the participant records (Section II) and the narrative summary (Section III) uploaded?

Response #12: The UB Performance Report Web site has features for you to use to upload a file with participant data and another file with the narrative summary of project objectives and accomplishments. Once you are at the site and have entered your project identifying information in Section I, you will be given two methods to upload your files:

Enter the file name:

- When prompted, enter the file name into the window (e.g., A:\Student.txt); and
- Click the Upload button to start the file upload.

Or use the Browse feature to locate the file:

- Click the Browse button to open the window that will allow you to locate the file with the participant data (or the narrative summary) on your computer;
- Click on the file name so it is highlighted;
- Click on the Open button to select the file name and close the Browse window; and
- On the UB Web page, click on the Upload button to start the upload.

With either method, when the upload is completed, the Web page will display the “Filename” and “File Path.” Check these before proceeding to ensure that the correct files were uploaded.

Question #13: Will a project receive confirmation that the report has been successfully submitted?

Response #13: Yes. When completing Section I of the report on-line, the person entering the performance report data will be asked to provide an e-mail address. After the report is completed and you click on the “Submit” button, a message will display indicating that your performance report has been successfully submitted. A confirmation will also be automatically e-mailed to the e-mail address provided.

Question #14: After electronically submitting the report, should a project also send a paper copy of the report with the original signature of the project director and certifying official?

Response #14: Except for Section I, the Department of Education only requires an electronic version of the performance report information. A grantee, however, must submit, via fax, a signed copy of Section I of the report form that certifies that the information submitted electronically is accurate, complete, and readily verifiable. The signed copy of Section I only of the report should be faxed to: (703) 991-6021. Please do not fax in a copy of the entire report.

Question #15: What is the mailing address for submitting the annual performance report?

Response #15: A mailing address is not needed, since the performance report must be submitted via the Web. The Web address for submitting the report electronically will be available around **October 22, 2003**, at:

<http://www.ed.gov/print/programs/trioupbound/report.html>

Question #16: When is the annual report due?

Response #16: In accordance with Department regulations, the annual performance report is to be submitted within 90 days after the end of each 12-month grant (budget) period. For the 2002-03 performance report, the Department of Education has extended the report due date to November 30, 2003 for those Veterans Upward Bound projects with project periods that began in June, July, or August 2002.

Grantees should not wait until the last week of November (or December for UBMS) to submit their performance reports via the World Wide Web, as this practice has the potential of overloading the Web sites. When there is a large number of users on a Web site at one time, there may be interruptions and delays. Upward Bound grantees are asked to submit their performance reports as soon as complete data are collected.

II. PROGRAMMATIC QUESTIONS

Question #17: What is a “Batch Year”?

Response #17: The Batch Year (Field #2 of the Record Structure for the Participant List -- Section II of the performance report) designates the grant (project) year that is being reported. The Batch Year changes with each annual submission of individual participant records. The Department designates the Batch Year as the beginning year of the 12-month grant period. This may or may not be the same as the school year or academic year designations of some institutions. The Batch Year was chosen because TRIO projects are forward funded (e.g., Fiscal Year 2002 funds were used to support the 2002-2003 project year). For the 2002-2003 performance report the “Batch Year” is 2002. Thus, the individual participant information provided will be for those students served by the project from the Summer or Fall of 2002 through the Spring or Summer of 2003.

Question #18: What PR/Award Number should be used?

Response #18: A grantee should use the PR/Award Number applicable to the grant (budget) period covered by this report. This number can be found in Block 5 of the Grant Award Notification. Be sure to use the current PR/Award Number for the 2002-2003 project year. For the 2002-2003 report, the PR/Award Number begins as follows:

Upward Bound	P047A99 _ _ _ _
Upward Bound Math/Science	P047M99 _ _ _ _

If you received a new Veterans Upward Bound grant in 2003, remember that the 2002-2003 reporting period pertains to your previous award; thus you should **not** use your new grant number, i.e., one beginning P047A03 or P047M03, in this year’s report form.

Please note that the PR/Award Number is eleven (11) digits. Please be sure you use “zeros” instead “Os” when entering the PR/Award Number into your database.

Question #19: What are the differences between a continuing, re-entry, and prior-year participant (field #16)?

Response #19:

- A *continuing participant* is an individual who participated in the project in both the current reporting period (program year 2002-2003) and the preceding project period (program year 2001-2002).
- A *re-entry participant* is a former project participant who participated in the project during the current reporting period (program year 2002-2003) but not during the preceding project period (program year 2001-2002).
- A *prior-year participant* is a former project participant who did not participate in the project during the current reporting period (program year 2002-2003).

Example for 2002-2003 report:

Continuing participant	2001-2002 and 2002-2003
Re-entry participant	2000-2001 and 2002-2003
Prior-year participant	1999-2000 and/or 2000-2001 and/or 2001-2002

Please be sure to **include each participant—whether new, continuing, re-entry, or prior-year--only once in the file you submit for the reporting period.**

Question #20: After the end of the 2002-2003 reporting period, but before the due date for the report, I was able to gather information about students' postsecondary status. Should I include that information in this year's report?

Response #20: Yes. We want to know about each student's postsecondary status at the first opportunity. To the extent practicable, a Veterans Upward Bound project should report on or update the postsecondary status of recent program graduates and prior participants in this year's performance report.

Please note that postsecondary enrollment fields 52-60 should be left blank for participants who have not yet completed the educational program offered by the project. 9 or 99 "Inapplicable" codes should be used only for participants who have completed the educational requirements needed to enroll in postsecondary, but who have not enrolled or will not enroll in postsecondary.

Question #21: What is the definition of a participant in a Veterans Upward Bound project and how long must the participant's record be maintained on the database file?

Response #21: The Upward Bound regulations do not provide a definition for a Veterans Upward Bound participant. Therefore, each individual Veterans Upward Bound project may determine who is a participant in the project.

Beginning with participants served in program year 1999-2000, all Veterans Upward Bound participants should be maintained on the database file and updated annually, if possible.

Question #22: To what extent must a Veterans Upward Bound project follow up on prior-year participants?

Response #22: The Department expects a Veterans Upward Bound project to annually follow up on prior-year participants to determine their academic progress for four years after completing the program. However, the Department does not expect a project to continue to try to find prior-year participants that the project could not locate in the previous year's follow-up.
